

Bone grafting

BLOCK GRAFT FOR REIDGE AUGMENTATION

Pre Operative & Operative View

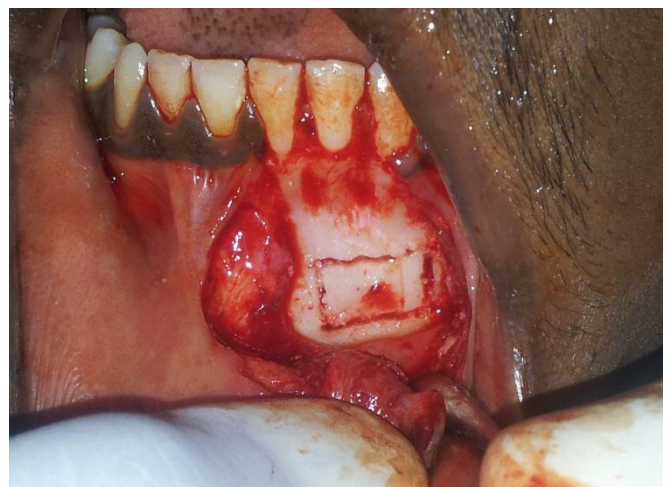

Pre Operative view

Ridge defect in 22 region

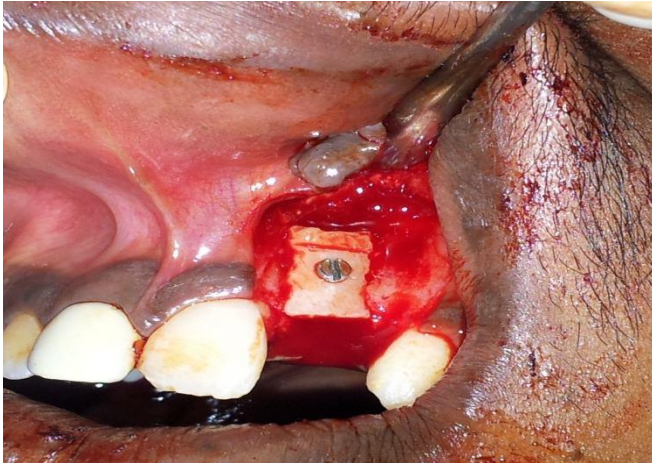

Preparation of Donor site

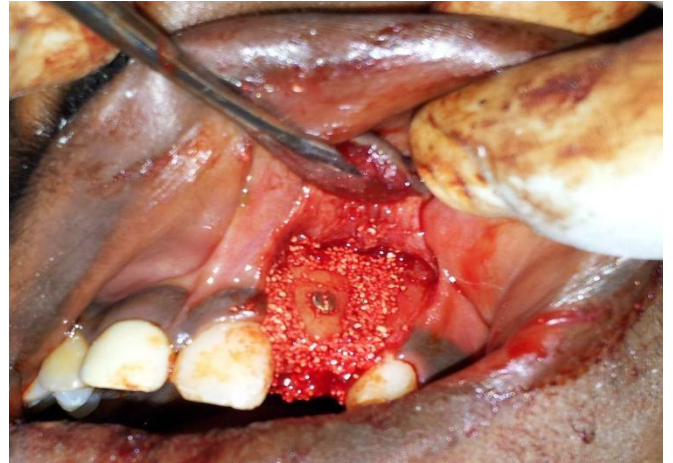

Block graft Harvesting

Operative View

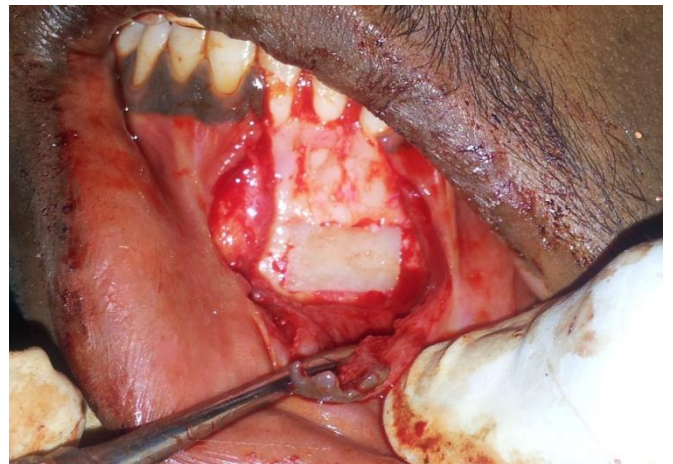

Graft Secured in recipient site

Osseograft added in recipient site

GTR membrane placed

Bone wax placed in donor site

Operative & Post Operative View

Flap sutured in Recipient and Donor site

Post Operative view of Recipient and Donor site

*Mucogingival
Surgery*

Free Gingival Graft with Coronally Repositioned Flap

Stage -1 Surgery

Pre Operative view

Preparation of recipient site for FGG

FGG sutured in the recipient site

2 years Post Operative view

Free Gingival Graft with Coronally Repositioned Flap

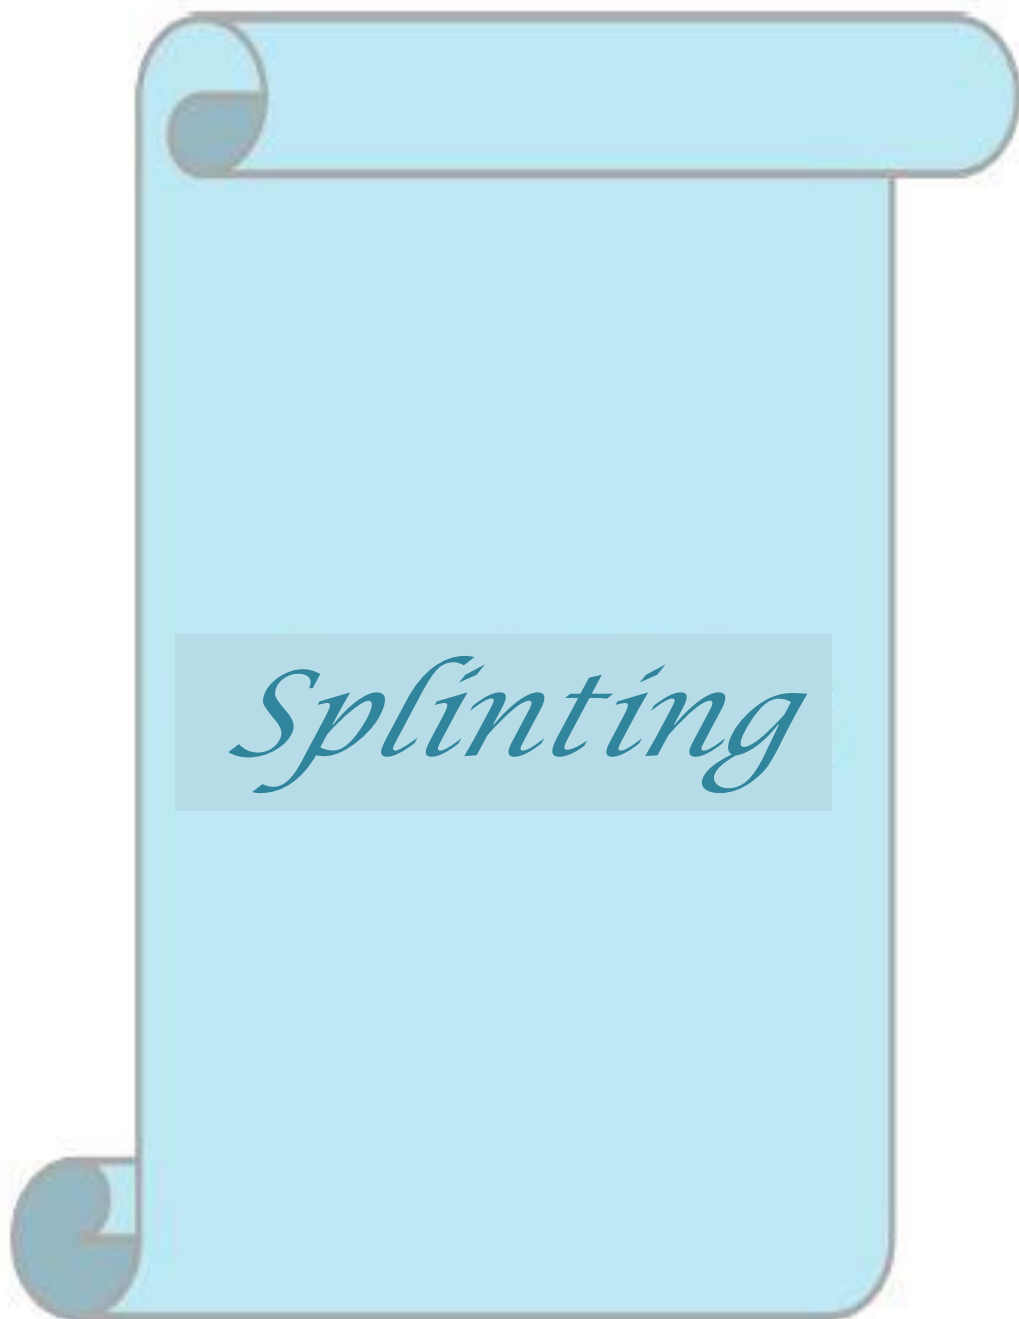

Stage -2 Surgery

**Coronally Repositioned Flap following FGG
(Done after 2years)**

2 weeks Post Operative view

Splinting

Fiber Splinting

ACID ETCHING

BONDING AGENT

FIBRE OPTIC SPINTING

Fiber Composite wire Splinting

PRE OPERATIVE

COMPOSITE & WIRE SPLINTING

*Laser Surgical
Procedures*

PROBING POCKET
DEPTH EVALUATION

INCISION

ELEVATION OF FLAP

SUTURING OF FLAP

Laser Depigmentation

PRE OPERATIVE

LASER DEPIGMENTATION

POST OPERATIVE - 3 MONTHS

*Laser Excision of
OSMF Bands*

LASER EXCISION OF OSMF BANDS

PRE OPERATIVE

LASER EXCISION OF
OSMF BANDS

POST OPERATIVE

*Laser Mucocele
Excision*

LASER ASSISTED MUCOELE

*Laser Ablation of
Leukoplakia*

LASER ABLATION OF LEUKOPLAKIA

Laser Excision

PRE OPERATIVE

LASER EXCISION OF
TRAUMATIC FIBROMA

POST OPERATIVE

*Management of Endo-
Perio Lesion*

MANAGEMENT OF CERVICAL RESORPTION

PRE OPERATIVE

LASER EXCISION OF
TRAUMATIC FIBROMA

CERVICAL RESORPTION
MANAGEMENT-TRICHLORO
ACETIC ACID

CERVICAL RESORPTION
MANAGEMENT-MTA+GIC

POST OPERATIVE
